

A customised gritting machine concept:
Functional, efficient, economical!

Gmeiner Tracon and Tracon Plus

Gmeiner Tracon and Tracon Plus High grade gritting machines for tractors

The gritting automatons of the proven series Tracon and the new series Tracon Plus are best suitable for assembly on tractors with three-point hydraulic due to the low container design. The vehicle/device combination is optimally adjusted for your usage needs in the communal area. You can choose between dry material or wet salt automatons, one-chamber or twin-chamber design.

The series Tracon can be supplied in container sizes from 1.0 m³ to 1.8 m³ in dry material design as one-chamber or twin-chamber gritting automaton. The series Tracon Plus can be supplied in container sizes of 0.8 m³ and 1.2 m³ and, as an option, also with wet salt equipment of 420 litres capacity. Also this series can be supplied, on request, as twin-chamber design.

Whatever your requirements or wishes might be - with a gritting automaton of the series Tracon or Tracon Plus you choose high reliability, first class services and reasonable price-performance ratio.

The benefits of the Gmeiner Tracon and Tracon Plus:

Build with a large amount of stainless steel:

- Connection and fastening elements are made from stainless steel
- Gritting plate and slide sheet are made from stainless steel
- Equipment safety cover is made from stainless steel
- Folding roof mechanism is made from stainless steel
- Optional partition wall is made from stainless steel

Very quick assembly:

- Economical use of the front axle
- Extremely short assembly rearwards
- Operator has a good overview from the driver's position
- Low centre of gravity
- Secure travel, even when the gritting container is full

Optimum flexibility:

- Container sizes 1.0m³ to 1.8m³ at series Tracon

- Container sizes 0.8m³ to 1.2m³ at series Tracon Plus
- Gritting amplitude can be set 1 - 8 m
- Route dependent distribution of gritting material
- Three point assembly for all conventional tractors (cat 2)
- Supplied with a power take off and an independent hydraulic system
- Double chamber design for salt, sand and grit
- Can be optionally equipped for wet salt
- Many additional options are available

High quality standard:

- Self-supporting container construction (material thickness 4 - 6 mm)
- Weld connections throughout
- Protected built in control components
- Special weatherproof paint for snow and ice clearance
- Manufactured using high quality components
- Checked distribution of the gritting material
- Certified in accordance with ISO 9001:2008

Combinations	Tractors up to 100 PS	Tractors 100 to 150 PS	Tractors over 150 PS
Tracon 1000	DM		
Tracon 1500		DM	DM
Tracon 1800			DM
Tracon 800 Plus	DM / WS		
Tracon 1200 Plus	DM	DM / WS	DM / WS

Assembly options for tractors: According to your carrier vehicle, there are various gritting machines available for assembly. Of course upon request, we are happy to calculate the exact axle load in order to establish the right equipment for you. (DM = Dry material, WS = Wet salt)

Gmeiner Tracon: Supplied in container sizes 1.0m³ to 1.8m³, with or without wet salt equipment.

Gmeiner Tracon Plus: Supplied in container sizes 0.8m³ to 1.2m³, with or without wet salt equipment.

High level of user comfort: Operating console with high level of user comfort.
