# PakMor Integrated Auger Compactor

# PakMor Integrated Auger Compactor Specification Sheet

MODEL: TRC10-A-90  
 DATE: MARCH 2017  
 SHEET: 1 OF 1

## Model: TRC10-A-90

The PakMor Single 900mm Integrated Auger Compactor is specifically designed for compacting large volumes of waste material. As an Integrated Compactor the machine is suited for wet material such as General Waste. The Integrated 900mm Auger is ideal for shopping centres hospitals and industrial sites.

PakMor Auger Compactors offer a sealed compaction chamber without cavity for waste to collect, decompose and smell. The sealed compaction chamber combined with a Integrated body prevent liquid leaking from the machine. Auger Compactors allow for loading over the front and either side from ground level.

The TRC10-A-90 is driven electrically with an electric motor and gearbox to drives the auger. The auger is suspended in a trough, as the auger turns it crushes and forces waste into the collection body. Augers are the only style of compactor that allow for continuous loading.

Loading Hoppers, Doors, Chutes, Bin Lifters, cycle time, eye starting etc. are all customised to suit customer and site requirements.

**The advantages of using a compactor:**

- Reduce waste volume, reducing transport movements and costs
- Minimise waste storage space on site

**Specifications:**

Bin Capacity	: 5-30 Cubic metre
Auger Diameter	: 900 mm
Auger Speed	: 8 rpm
Motor Drive	: 10 kw
Head Weight	: 1750 kg
Power Supply	: 415 volt, 3 phase, 32 amp, 5 Pin

**Schematics Layout:**

Integrated Auger Compactor with a 25m<sup>3</sup> Body.  
 All dimensions are in mm.
