V-Ploughs

Giletta V
V-Ploughs

Giletta V V-Ploughs

V-ploughs with adjustable geometry V SERIES are designed for heavy duty snow removal.

V-ploughs are multi-purpose and offer excellent snow clearing performance in all working conditions.

Their special frame allows 3 working positions:

POSITION 1 = V-plough

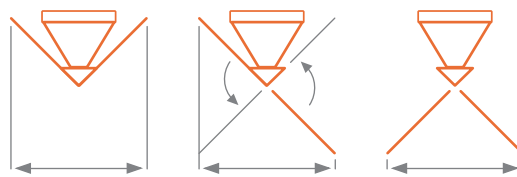

The vehicle drive is easier, the stability better and the snow penetration more efficient.

POSITION 2 = Snow-plough

It allows snow to be simply angled to the side.

POSITION 3 = Shovel

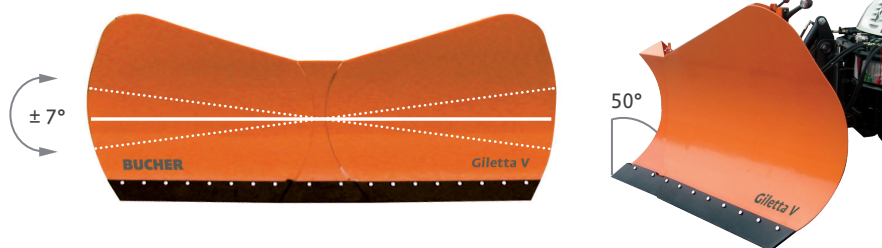

It allows for pushing snow into piles/heaps.

	L1 (mm)	L2 (mm)	L3 (mm)
VA 08	2,700	2,650	2,420
VA 10	2,900	2,790	2,620

Features:

- Painted steel shield.
- Epoxy-polyester shot blasting and painting at 200°C.
- High penetration curved shape.
- Assembly on any kind of trucks equipped with front plate.
- Special Hardox steel cutting edges with 400 hardness
- Signs conforming to the regulations in force.
- Coaxial pipes allow the central oscillation $\pm 7^\circ$.

Hydraulic installation:

- Lifting via double effect piston with in-built safety valve.
- Opening of ailerons via two double effect pistons with safety valve, by-pass and hydro-pneumatic accumulators.
