# Improve **speed** and **efficiency** with the Bucher Force series

# Refuse solutions to manage waste in more efficient ways

### Bucher Force front loader series

Since its release in 2011, the Bucher Force (which stands for Front Operating Refuse Collection Equipment) has led the market in front loading refuse collection equipment.

This state-of-the-art equipment has been specifically designed, tested and manufactured to endure rugged Australian conditions meeting the physical and time demands of industrial waste collection routes. Its high packing forces and floating blade technology allows the

Force to carry the maximum payload possible whilst minimising blade jams, meaning you can service more bins before having to empty the load.

Our Bucher Force front loader has been designed to meet customers' expectations around durability, productivity, safety and reliability.

Available in 28.5m³ & 33.5m³ body sizes

## What benefits does the Bucher Force front loader offer?

Stronger, more efficient and reliable. Ideal for commercial applications, the Force front loader picks up bins quickly and compacts with a high force providing greater payloads.

Fully configurable control system (iQ CANBus) and diagnostic interface at the vehicle operator's fingertips.

Constructed from high quality wear resistant steel, making them strong, light and hard wearing.

Comprehensive range of safety features to keep both vehicle operators and communities safe. Fully compliant with Australian OH&S standards, as well as VSB6 and body builders guidelines.

**Body constructed**  
from single sheet wear resistant steel, providing longer working life.

**Lighting**  
LED upper and lower tail lights with guards rear mounted amber flashing beacon and guard.

**'Floating Blade' technology**  
with replaceable wear pads prevents blade jams to maximise vehicle uptime.

**Scissor-type compaction system**  
enables a higher compaction force and greater payloads.

**A three lid hopper system**  
improves shielding to minimize wind-blown rubbish, overall operating height and reducing the overall environmental impact of the vehicle.

**Fastest, most efficient front loader on the market**  
with 2500kg lift capacity and 12sec lift cycle time, allowing drivers to pick up more bins per shift

**Front ZONE detection system for pedestrian safety**  
Fully integrated into our control system to eliminate additional screens and clutter in cab for safer operation.

**'On-Demand' hydraulic system**  
provides more efficient operation and fuel savings for reduced running costs.

**Ability to pack load and pick up bins simultaneously** for greater efficiency at sites with multiple bins

**Sliding Forks**  
The fork width is adjustable to suit various bin sizes and can be controlled from the in-cab joystick.

**Fire suppressant system**  
It provides the ability to either sense carbon monoxide and/or douse a fire in the body without opening the tailgate to dump the load

**Camera Systems**  
Multiple camera brands available, integrated with Bucher LCD screen for optimal safety vision. Single screen option for less clutter in cab.

**Bin lifter Weighing System**  
Fully integrated options available to monitor payloads, axle limits and individual bin weights. NMI certified options available for charge by weight capabilities.

**MGB Lifter with wireless remote**  
Suits full range of 80L-1100L MGBs. Robust bolt-on design with clamp bar and belt with winch to secure bin during tipping

**Extended Warranty**  
2 years/5000 hours warranty available providing comprehensive protection.
