Bucher Spoutvac Combo

Vacuum and Jetting solutions for any cleaning challenge

Bucher Spoutvac Combination unit

Bucher's latest acquisition combines the knowledge of market leaders in the vacuum and jetting industry with the support and focus of a global company and national support network to bring you one of the most efficient vacuum and jetting units in the market.

Offering a versatile solution for a wide range of applications and designed to meet the demands of both municipal and industrial environments, this unit is equipped with advanced technology and robust construction for optimal performance and reliability.

With its powerful suction capabilities, the vacuum function effectively removes debris, waste and blockages from any

sewer or drain system. The drain cleaning system, on the other hand, is designed to clear obstructions from drains, pipes, and sewers, ensuring smooth flow and preventing backups.

Whether you're tackling routine maintenance or dealing with emergency situations, Bucher's vacuum and drain cleaning combination unit is the ideal tool for efficient and effective cleaning operations.

Available with debris tanks ranging from 7,000L-14,000L to suit a variety of 6x4 and 8x4 chassis configurations

What **benefits** does the Bucher Spoutvac Combo offer?

Versatility

Offering a wide range of tools to clean anything from drain and sewer cleaning to non destructive digging in both municipal or industrial applications.

Reliability

Like all equipment from Bucher Municipal, the Spoutvac Combo offers a long service life, trouble free operations and reduced maintenance costs to maximise profitability of your operations.

Performance

With its powerful vacuuming, high-pressure jetting, and innovative features like the bubbler filter, remote control and variable pressures, the combination unit is highly rated for a variety of cleaning applications.

Australian Made

The Bucher Spoutvac Combo is proudly designed, manufactured and tested in rugged Australian conditions, assuring customers of rigorous quality control and a sustainable approach to design.

Safety

Bucher strives for the highest level of industry standards; our vehicles are ADR compliant and offer a range of safety features including:
Mechanical rear door locking, safety props, drive away protection, access ladders with harness, E-stops.

Cassette System

Automatic feedbox to lower and raise vacuum hose into pits with minimal lifting by the operator and option for various extension lengths and types.

Hose Reel

1" hose reel holding up to 240m of hose length. Variable speed and auto layering making it faster to set up and pack up whilst limiting manual handling of the operator.

Control System

Rear unload buttons to control rear door and tank.

Rear Boom Locking System

Automatic reel locking system to prevent operator injury from manual handling.

Bucher iQ Control System

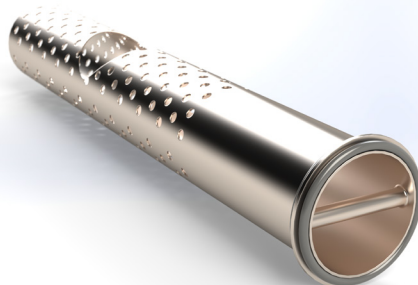

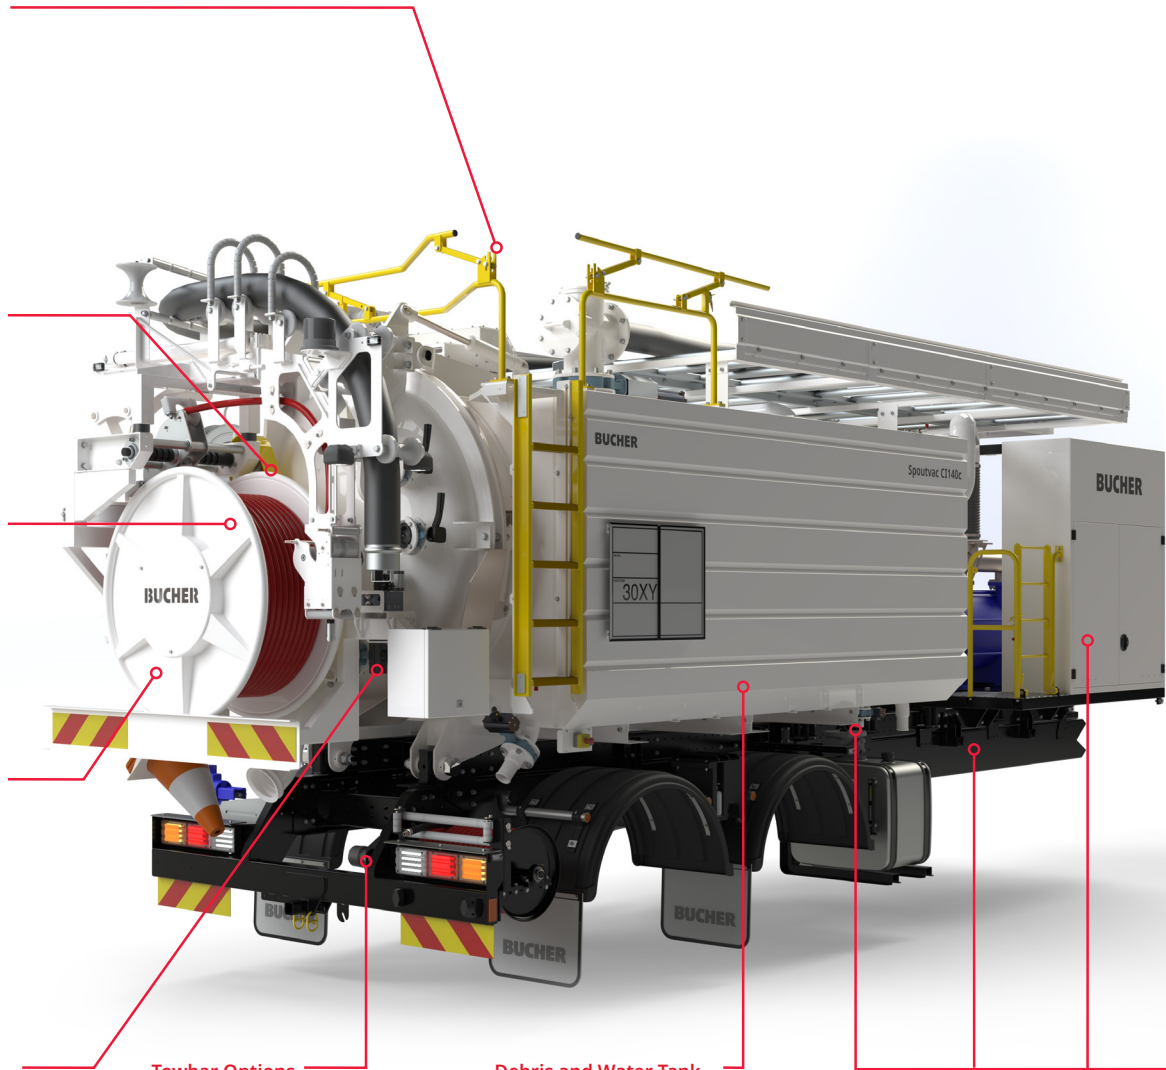

The new Bucher iQ control system, featuring a 10" touch screen, push button boom, reel controls, and rotary dial for speed and pressure adjustments.

Towbar Options

Hydraulic takeoff for tools and a variety of tow options are available.

Debris and Water Tank

Made from 304 stainless steel for corrosion resistance and longer working life. Available in a range of sizes for vacuum and jetting purposes.

Cassette Vacuum System

19m storage capacity for the 6" vacuum hose. Hydraulic rollers automatically feed the hose in and out, reducing manual handling. Ideal for deep pits and wells. High-speed debris transport with minimal blockages. Easy top-tank inspection

Bubbler Water Vacuum Filtration

Bucher's specialised patented bubbler filtration system for industrial applications is the only one of its type making wet and dry vacuum possible. Coupled with a state-of-the-art cyclone filtration system that uses centrifugal forces to separate dirt, objects and particles from the air. Improving the air quality and reducing maintenance.

Bucher iQ Control Screen

The Bucher iQ Control system offers operator comfort with features like hotkeys, fuel burn display, live weights, hose reel counter, hints, diagnostics, and a cab-mounted graphic display for drive-away protection.

Vacuum Pump

Proven liquid ring system, robust designed vacuum pump with integrated speed..

Cyclone & Bubbler Filtration System

Centrifugal forces to separate dirt, debris and particles from the air, improving air quality and reducing maintenance.

Water Pump

Specialised water pump to effectively move water throughout the vehicle whilst being easily accessible for your maintenance needs.

Options

Designed to suit a range of options like Sign racks, Large toolbox and vacuum tube racks for easy access.

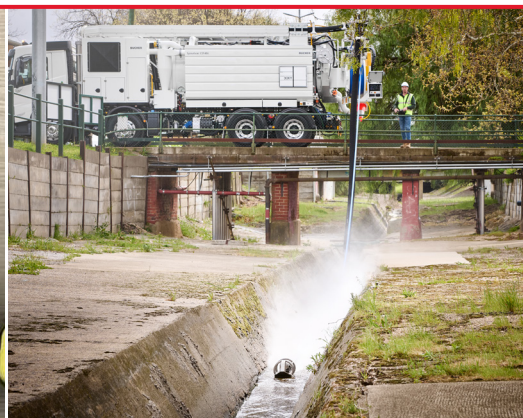

Modular Subframe

Full length integrated body subframe to evenly distribute load and optimise stability when tipping. The modular design also helps to integrate options.

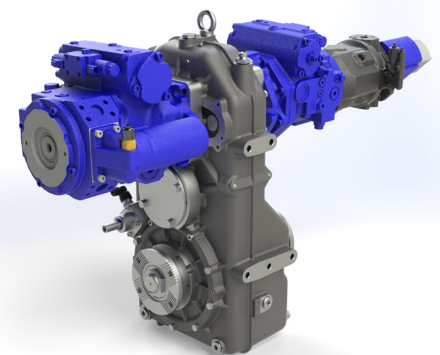

Remote Control With Display (Belly Box)

Fully configurable wireless belly box style remote control with display screen for the operator to operate at a high level whilst keeping safety in mind. Multifunctional controls, including a combination of switches, joysticks, levers and an e-stop. With the added benefit of seeing all operations and pressures on screen.

Accessories

Get more out of your unit by a wide range of accessories available to optimise performance and operator ergonomics

Vertical Split Shaft Transmission & Hydraulics

The Powerful and robust Vertical Split Shaft Transmission coupled with Hydraulic pumps offers independent variable speeds, providing the operator with precise control while performing any drain cleaning or vacuum operations. This provides high efficiency, reduced fuel and maintenance costs.
