# E35m

272"

96"

# **Dimensions**

Length* (hopper and cowl)	272" (6908 mm)
Width*	96" (2438 mm)
Height*	110" (2794 mm)
Wheelbase*	136" (3454 mm) nominal
Sweep Path, Main Broom	58" (1470 mm)
Sweep Path MB & (1) SB	90" (2280 mm)
Sweep Path MB & (2) SB	120" (3050 mm)
Extended Reach	144" (3650 mm)

<sup>\*</sup> Dependent on chassis and/or option selected

# Noise level cab

<75 dB(A) generally (dependent on chassis)

# Chassis

GVM 33,000 lb, class 7

# **Chassis engine**

6.7 250 HP
408 cu in
6
250HP @ 2200 rpm
660 lb ft @ 1600 rpm
Turbo Charged
Allison 3500 RDS
50 gal (190 l)

#### Main Broom

hydraulically driven polypropylene main broom with floating trailing arms.

# **Ultra High Dump**

providing an additional 18 inch tip height ideally suited to transferring debris into a tipper truck.

#### Rotatilt

allows in-cab adjustment of the gutter brooms to suit the changing profile of the road.

# E35m

#### Instrumentation/Controls

The Bucher E35m Mechanical Sweeper features a central cab mounted control panel with warning and information LEDs for;

- Low Hydraulic Oil
- Conveyor Stall Alarm
- Hydraulic Oil Temperature
- Hydraulic Oil Filter Restriction Indicator
- Low Water Alarm
- Hopper Up Alarm

All wiring is colour coded and numbered. All internal and external wiring conforms to IP65 and IP67 standards - waterproof and dustproof.

#### **Powertrain**

Utilising an Allison 3500RDS automatic transmission, a 10,000lb front axle and a 23,000 lb two speed rear axle the E35m sweeper and chassis are matched for optimal travel speed, sweep speed and payload performance.

#### **Brushes**

Gutter broom		44" (1100m)
Main broom	34.5" ×	(58" (870 x 1470mm)
Drives	Direct cou	upled hydraulic motor
Sweep path M	B & (2) SB	120" (3050mm)
Conveyor Type	:	Squeegee, 12 Flights
Sweeping spee	eds	2-15 mph

#### **Gutter Broom**

Large 44 inch, hydraulic driven, leading arm, digger type, free floating Gutter Broom with in-cab adjustable speed and down pressure insure aggressive cleaning of curbs and gutters

Option for the dual brooms to extend out to achieve a 144 inch total reach to facilitate culde-sac and curve sweeping.

#### **Main Broom**

Aggressive  $34.5 \times 58$  inch polypropylene tube main broom is direct hydraulically driven and attached to two fully floating trailing arms to allow for changing road surfaces.

#### **Dirt Shoes**

The sweeper can be fitted with standard T-Plate steel skid dirt shoes with carbide inserts or new maintenance free stripbrush type dirt shoes.

# Conveyor/Elevator

Chain driven, 12 flight- squeegee type conveyor over polyurethane sprockets. The conveyor height can be adjusted from in-cab to accommodate different sweeping requirements. The conveyor bearings are sealed and self-aligning.

#### Hopper

Variable Dump Height Hopper is raised and lowered via a heavy duty; two stage scissors lift with hydraulic cylinders.

Hopper voided volume\*\*

Discharge angle

Door opening angle

4.5 yd³ (3.4m³)

50° nominal

90° nominal

Fabricated from heavy duty stainless steel plate. Inspection hatch accessible from outside. All lift and dump controls are hydraulic and located in-cab. Lift capacity is rated at 12,000lb and hopper dump angle is 50 degrees for efficient off-loading of debris.

# **Hydraulic System**

20 gallon hydraulic reservoir supplying oil to a variable displacement hydraulic pump in a load sensing hydraulic system.

All hydraulic valves are equipped with light

All hydraulic valves are equipped with light emitting diodes to signal function and feature manual overrides. All hydraulics are centrally located in their own system locker for ease of access and maintenance.

# **Water System**

A 360 gallon baffled, polyethylene water tank provides the necessary water to supply a run-dry centrifugal pump delivering water to multiple water spray nozzles, strategically located at each gutter broom and over the main broom

Water capacity 360 gallons (1400 l)

A range of options are available – contact us for more information.

Subject to change without notice.

\*\*\* All Bucher Municipal Hopper Capacities are measured in accordance with European Standard EN 15429.
