

## Operator Training

Choosing class leading Bucher equipment is a great decision. Once your vehicles are in service it is vital that operational personnel fully understand how to use and take care of your investment. Bucher Municipal offers full Operator Training for our range of sweepers, winter maintenance and gully cleaning equipment. Operator Training plays a crucial part in ensuring your machine is used to its full potential and prolonging its lifespan. We can also offer training on products from our historic brands (Johnston, Giletta).

## Candidate Requirements

- A valid driving licence for the class of vehicle.

## Course Details

A certificated one-day course to teach up to two operators (or one operator if novice) best practice while using their Bucher equipment. This is conducted at your own premises, using your own vehicle. This allows us to train your operatives on their particular machine. Depending on type of vehicle, topics covered include:

- Essential health and safety information.
- Overview and familiarisation of equipment.
- Essential daily and weekly checks.
- Basic adjustments and maintenance for operator level personnel.
- Driving controls and techniques (compact sweepers).
- Operational controls and techniques.
- Filling or loading the machine, and drainage, emptying or unloading.
- Essential end of day routine.
- Winterization and cold weather procedures, use of onboard purge functions where fitted, including Pressadrain.

For more information on this course and other training that we can offer, please contact:
