

## Sewer Cleaning Familiarisation Training

Choosing class leading Bucher equipment is a great decision. Once your vehicles are in service it is vital that operational personnel fully understand how to best utilise your investment.

Here at Bucher Municipal, we offer training for our full range of Sewer cleaning vehicles.

Training plays a crucial part in ensuring your machine is used to its full potential and in prolonging its lifespan. We can also offer training on products from our historic brand, JHL.

## Candidate Requirements

- Operators must be in possession of a valid HPWJ certificate available for our trainer to view, prior to commencement of the course and at least one operator must have a current driving licence for the class of vehicle.

## Course Details

A certificated course for up to four experienced operators **or** two novices. These courses are carried out at your own premises using your own vehicle. This has the advantage of training your operators on their particular machine. Depending on the type of vehicle, the topics covered will include:

- Essential Health and Safety
- Overview and familiarisation of equipment.
- Essential daily, weekly, and monthly checks.
- Basic maintenance and fault finding.
- Operational controls and techniques.
- Essential end of shift cleaning procedures (Recyclers).
- Winter Maintenance.

For more information on the training, we offer please contact:
