

CAST Course

Choosing a class leading Bucher sweeper as part of your fleet is a great decision, and Bucher believes the next wise choice is to ensure your capital investment consistently delivers 100% performance every working day by ensuring sweeper operators receive bespoke training which results in best practice for achieving consistent sweeper performance.

Certificated Application Specific Training Course (CAST)

The Bucher CAST Course is usually conducted at customer premises, using a customer's own sweepers, which is a significant cost saving and reduces business disruption. The CAST Course trains up to maximum of 4 experienced operators each day - (two trainees in the morning and two trainees in the afternoon). A choice of four specific topics (requested by the trainee) will be covered in depth during training. On completion, the certificate awarded to each successful candidate will itemise the four procedures specifically selected.

Find below an example of specific procedures that have been requested:

- Driving Techniques : Kerb mounting
- Nozzle : Height setting, reverse lift function and "Powathrust"
- Front Brushes : Positioning, adjusting and changing
- Maintenance Regimes / daily and weekly procedures

For more detailed information on this course and other training that Bucher can offer, contact:
