Foreword

This section of the manual will help you when ordering parts and serves as an assembly/disassembly reference when used in conjunction with the Maintenance Section procedures.

About this section

Chapters 20 to 34, listed on the front sheet, cover the major areas of the machine. Some of the more popular options such as the Supawash hi-pressure water system, Channel Brush Rotatilt, Powaboom and Littasnatch wanderhoses are also covered in these chapters. Other more specialised options will be found in the Optional Equipment Chapter 35.

The Table of Contents on page 1 of each chapter locates the exact page a particular illustration or parts list is on. Parts that have been superseded and are not interchangeable with the new items are shown in a 'Superseded Parts' section at the end of the chapter.

The BoM numbers above the parts lists are for Johnston internal reference only.

On pages that have more than one part number column, the symbol '<' indicates that the number in that column is the same as that in the column on the left.

The symbol '>' in front of an item number indicates that item has changed from the one shown on the previous issue of that page.

Chassis Related Parts

The items listed below vary depending on what chassis the Johnston sweeper equipment is mounted to. If any parts for these areas are required, contact the Johnston Parts Department quoting the machine serial number shown on the plate fitted to the subframe crossmember below the body rear door.

- Batteries and battery mounting
- Cab - Sweep control installations (Chapter 32)
- Cab - single and dual steer parts
- Body discharge interlock
- Rear mounted fuel tank
- Gutter and wide sweep brush water spraybar mountings (Chapters 24 and 26)
- Supawash hose reel and front bumper spraybar mountings (Chapter 30.SW)
- Rear underrun bumper
- Rear mudguards and mudflaps
- Subframe to chassis mounts
- Work lights (Chapter 31)
- Channel brush pivot frame support posts (Chapter 24)
- Channel brush hydraulic hoses 75 and 84 (Chapter 24)
- Wide sweep brush hydraulic hoses 70 to 74 (Chapter 26)
- Customer options i.e. autolube, special beacons, reversing camera, handwash etc.

Notes

* Item 55 lists a range of fittings required for various fuel pipe sizes - Select as required.
The Fuel Pipe is that supplied with the chassis.

The current type 'B' and superseded type 'A' Fuel Tanks share the same part number as they are interchangeable. Type 'B' can be identified by having the sender position more to the centre of the tank than on type 'A'.

The sender adaptor plate and gasket are not interchangeable, see items 56 and 57 for type 'A' and 32 and 33 for type 'B'.

Fan Case Outlet Flap

Safety Precautions

Ensure the outlet flap is correctly set - see below.

Setting Procedures

There should be 2-3mm of free play between the flap (1) and the angle stop inside the fan outlet, as shown, when the flap actuator (7) is fully depressed against the fan case seal face. Adjustment is made by releasing the yoke end locknut (13) and rotating the actuation rod (14) to move the yoke end up or down the rod as required. Having achieved the correct setting, retighten the locknut.

Settings and Assembly Details

2. FANDRIVE PUMP:-

- c) "Standby" differential pressure setting
- d) Main relief valve maximum pressure setting
- e) Set displacement limiter dimension to 30mm

4. TRANSMISSION PUMP:-

- Charge Pump pre-set to **24 Bar**
- a) Forward drive relief setting **420 Bar**
- b) Reverse drive relief setting **350 Bar**

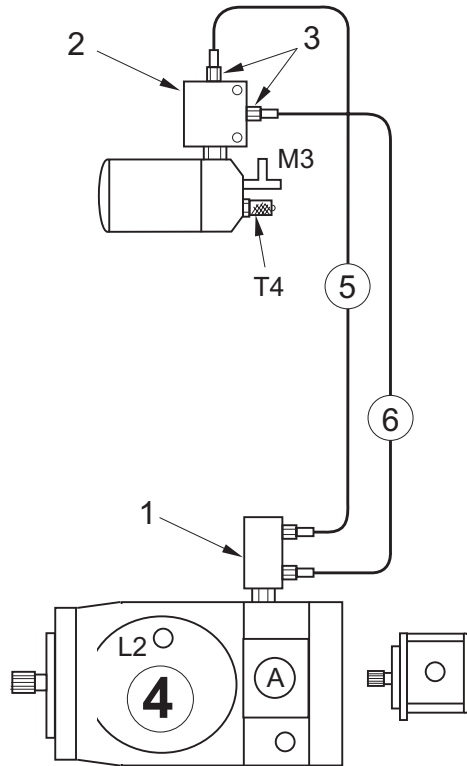

- Test assembly for leaks
- Test 'free movement' of sliding gears at 1.0 bar maximum air pressure
- Test switches for on/off operation/engagement
